

Recruiting Referees is Only Half Your Problem...You Also Need to Assign Them to Games...And Pay Them!

One of the most difficult programs to manage is recruiting and assigning game officials. Whether for a small or large league, there just aren't a whole bunch of people stepping forward and putting their hand up to referee. But for those that you have, you need to make referee scheduling as fair and easy as possible.

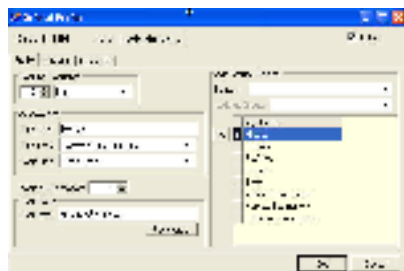

Welcome to SportzSoft Referee Scheduler, a comprehensive referee management and scheduling system.

Referee Assigning and Scheduling can be a real hassle. But, with SportzSoft Referee Scheduler, things just got a whole lot easier.

Referee Database

We begin with a comprehensive referee database that tracks all the key information required about your referees. Personal contact information, age, certification level, age groups and levels they are qualified to referee, and account username and password are some of the key information items tracked in the system.

Other information includes, referee assignor comments, referee request comments, number of games officiated, games officiated in past 7 days, games officiated in next 7 days and club or team associated with.

Web Based Accounts

Referees sign into an online account where they are able to search the games available to them and place a 'request' to referee one or more games.

Once they have placed their 'requests', an assignor reviews all game requests and assigns the required referees for each game.

Games are then 'confirmed' for these referees to complete. An email can be sent out informing referees of their 'confirmed' games or referees can login to their account and print off a list of their confirmed games.

Referee Assigning

Referee assignors have a powerful set of tools to analyze:

- game requests / details
- referee database
- game schedule

With all this information in front of them, assignors are able to quickly and easily assign games in a fair and equitable manner, making sure that referees are officiating to the proper level and with the proper partners.

Payroll

Base fees are setup in the system and automatically applied and calculated when referees are assigned to a game. Other game expenses such as travel, meal and/or per diem can be entered on the game record as well.

Payroll reports are easily generated so that referees can be paid accurately and on time. Payroll reports show up in each referee's online account, so they can track their games and payments.

Key Features:

Referee Assigning:

- Powerful screen displays game schedule, referee database, referee game log and scheduling details
- Unscheduled games appear in red
- Software automatically calculates officiating fees and allows for collection of travel, per diem and other expenses
- Email messages can be sent to referees once games have been assigned or ad hoc messages can be sent out as required

The screenshot displays a complex software interface with multiple panes. The top pane shows a list of games with columns for game ID, date, time, location, and status. Below this, there are several smaller panes, including one that appears to be a referee database with columns for referee name, contact info, and availability. The interface is designed for managing sports officiating schedules.

Payroll:

- Automatic payroll reports roll up all officiating fees and expenses on a game by game basis
- Once cheques have been issued, paid date can be entered on applicable games
- Game log and payment status appear on referees online account

Service:

We help you every step of the way

Our expertise is second to none. We have helped many organizations determine the best way to set-up and administer programs using our software.

Complete training and support

We will provide complete training and support so you are up and running right away. Extensive online help files are also available 24/7.

Full Maintenance

You'll never have to worry about server upgrades, backups or maintenance. We will ensure you are up and running all the time.

Referee Database:

- referee profile for each referee
- key contact information including 2 email addresses
- certifications tracked and managed
- setting for appropriate level or age group the referee can officiate – only games of those age groups and/or levels will be available to the referee to request

Referee Web Based Accounts:

- Referees 'request' games via their online accounts
- Ability to update personal contact information
- Presents lists of 'requested' and 'confirmed' games
- Game log indicates all games officiated and payment status for each; referees can also export this to excel

The screenshot shows a web-based interface for referees. It includes a header with the organization name 'Ontario United Lacrosse Association'. Below this is a navigation bar with links like 'Home', 'About Us', 'Referee', 'Game', 'Payment', and 'Help'. The main content area has a 'Referee Information' section with fields for 'Online Information', 'Location', and 'Access Code'. Below this is a table titled 'Referee Games' with columns for 'Game ID', 'Game Date', 'Game Time', 'Game Location', 'Referee Name', 'Game Status', 'Game Level', and 'Game Age'. The table contains several rows of game data.

SportzSoft - Accelerating Sport Referee Scheduling!

- Get control, increase revenue and improve service.
- Optimum management in minimal time. An investment you can't afford to ignore.
