SportzSoft Scheduler

Meeting the Needs of Sport Program Scheduling…

Unless you are organizing a simple tournament, scheduling can be a real pain! Facilities are hard to come by, and when you do book them, they need to be used to their fullest. Busy schedules, travel, and league coordination require careful attention to numerous scheduling constraints placed on teams. But what if you have 50 or more teams…how can you possibly manage?

SportzSoft Scheduler is the solution. Its intelligent design allows for team administrators or numerous league coordinators, to input key information around available time slots and team constraints, which the system then uses to generate a schedule.

Scheduling can be a nightmare, especially if you face it alone. But with SportzSoft Scheduler, you're not alone. Our powerful integration tools and advanced programming will get you up and running with a schedule in no time!
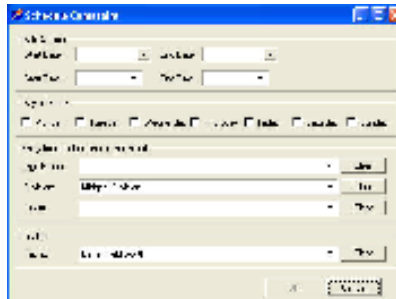

Collect Input from Multiple Sources!

Why work alone? With SportzSoft Scheduler, you can have numerous 'team or league administrators' help you input time slot and team constraint data over the web. All input is stored in a powerful database and later used to generate the schedule.

Schedule Constraints

Constraints are entered on a team, division, league or facility basis. Constraints include such things as:

- dates when teams can play
- specific times teams can play
- specific locations a team can play at
- dates that must be blocked off

Travel constraints can also be set which identify the circumstances a team would stay overnight or return home when playing away games.

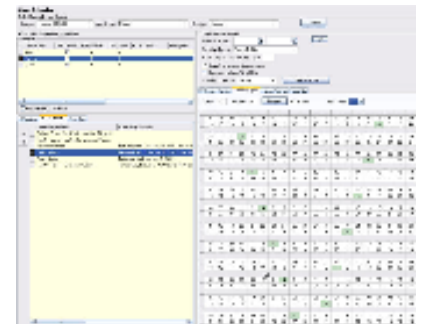

Enter Timeslots

Easily enter available time slots for your schedule by making use of the multi-user web interface.

Generate Schedules Quickly and Easily

Once you have setup your time slots and constraints, you are ready to create a schedule. SportzSoft Scheduler's powerful algorithms automatically apply all constraints and generates a schedule according to the settings made for the league. Games are balanced automatically and a schedule displayed.

Review Schedules

Once schedules have been created, team administrators can review schedules via their web account and provide comments back to the master scheduler.

Change Orders

No more spreadsheets, no more emails….all game schedule comments and change orders are submitted online and stored in a database for easy access, review and management. An approval process has been setup to manage them.
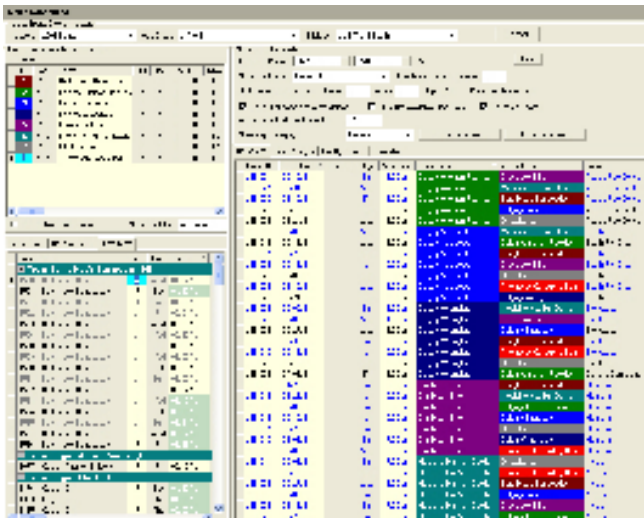

No other scheduling system comes close to SportzSoft Scheduler!

Key Features:

Scheduling:

o Automatic schedule generation based on applicable time slots, constraints and scheduling rules

o Schedules are balanced with equal number of home and away games

o Game balancing ensures that games are scheduled within the specified date range and according to the number of games required per team

o Scheduling supports inter and cross divisional play

Constraints:

o Constraints can be setup on a <u>league, division or team</u> basis to restrict scheduling based on:
  ▪ Date
  ▪ Time
  ▪ Location / facility
  ▪ Cross or inter-divisional play
  ▪ Travel preferences and multiple overnight games

o Constraints can also be set on a <u>facility</u> basis

Multi User Input and Access:

o Team or league administrators can input time slot or team constraint information into the database to help reduce the load of master schedulers

o Web access allows for schedule review

o Schedule changes are submitted as 'schedule change orders' and tracked in a database

SportzSoft - Accelerating Sport Scheduling!

• Get control, increase efficiency and improve service.

• Optimum management in minimal time. An investment you can't afford to ignore.

Service:

We help you every step of the way
Our expertise is second to none. We have helped many organizations determine the best way to set-up and administer programs using our software.

Complete training and support
We will provide complete training and support so you are up and running right away. Extensive online help files are also available 24/7.

Full Maintenance
You'll never have to worry about server upgrades, backups or maintenance. We will ensure you are up and running all the time.
